(54) Title: CROSS-LINKED PRODUCTS WITH NO BLOOMING AND REDUCED FOGGING

(57) Abstract: The invention relates to the use of copolymers comprising olefin-derived as well as anhydride and/or acid moieties in the cross-linking of polymers/elastomers using free radicals obtained by decomposing a peroxide. The cross-linked products show essentially no blooming and reduced levels of volatile compounds when compared to products that are cross-linked in the absence of said copolymer.
